

Grew up and studied at the eastern region of Saudi Arabia , graduated from KFU Marketing and business , developed my art in my own way by Looking, searching and open learning in following the colors and ideas where ever it exists .

Art is a language in each and every image I create , I always want to explore a an idea in a deeper way explore more of that struggle between body & soul .. the gap between them and the attachment as well , the trap we may feel within and the wholeness . I always take a hint from everything exists around .. everything talks to main a certain way and that's when I try to transfer it through the brush and colors or anything I feel that may complete the scene in boundless way . Dreams , Music , Movies and literature or even simple situation can create a world of it self on the canvas to be . Am always inspired by Klimt , Francis Bacon, Henri de Toulouse-Lautre , Luis Felipe Noé . love the levels they reached to in clarifying there souls , and The more I look for artists and art around me.. Either before or after I end up feeling that I know so little . and so.. all I tend to reach for is to know my self more and try to exist through my art .
